# INTRODUCTION

Labour force statistics as reported at the Ninth Census of Canada taken as of June 1, 1951, are published in two volumes. Volume IV presents basic characteristics of the total labour force while Volume V deals mainly with those relating to the wage and salary earner segment of the labour force.

**Labour Force.** — The labour force, as defined in the 1951 Census, includes all persons 14 years of age and over, who, during the week ending June 2, 1951:

(a) Worked for pay or profit or did unpaid work that contributed to the running of a farm or business operated by a member of the household. (Reported as "worked" in Question 20 or "yes" in Question 21)*

(b) Had jobs but did not work because of illness, bad weather, vacation, industrial dispute, or temporary layoff with definite instructions to return to work within 30 days of the time of being laid off. (Reported as "with a job but not at work" in Question 20 and "no" in Question 21)*

(c) Were without jobs and were seeking work during the week. This category includes those who would have looked for work except that they were temporarily ill, were on indefinite or prolonged layoff, or believed that no work was available. (Reported as "looked for work" in Question 20 and "no" in Question 21)*

**Persons not in the Labour Force.** — The non-working part of the population 14 years of age and over consists of those who, during the week ending June 2, 1951, were outside the labour force in the sense that they did not work for pay or profit or as unpaid workers in family enterprises such as farms or businesses, did not have jobs even though not at work, and were not actively looking for work. It includes, therefore, persons going to school, keeping house, permanently unable to work, retired and voluntarily idle, and those not otherwise classifiable.

(a) **Keeping House.** — Includes persons who were occupied with their own housework or management of their own homes or children, were so occupied helping other members of the household, or would have been so occupied except for temporary illness. (Reported as "keeping house" in Question 20 and "no" in Question 21)*

(b) **Going to School.** — Includes persons who attended any kind of educational institution in which students do not receive any compensation in money or kind. (Reported as "going to school" in Question 20 and "no" in Question 21)*

(c) **Retired or Voluntarily Idle.** — Includes: persons who were retired whether on pension or not; and persons able to work who were not working, not actively looking for work, not keeping house, or not going to school. (Reported as "retired or voluntarily idle" in Question 20 and "no" in Question 21)*

(d) **Permanently Unable to Work.** — Includes persons who were permanently unable to work because of old age, physical or mental disability or chronic illness. (Reported as "permanently unable to work" in Question 20)*

(e) **Other.** — Includes persons whose major activity was one not described by any of the foregoing classification terms. (Reported as "other" in Question 20 and "no" in Question 21)*

* Questions 20 and 21 on the 1951 Census Population Questionnaire were designed to permit classification of persons 14 years of age and over as either in the labour force or not in the labour force during the week ending June 2, 1951. Complete instructions regarding completion of these two questions as given in the "Enumeration Manual" are reproduced in Appendix A.

# INTRODUCTION

La statistique de la main-d'oeuvre telle qu'elle a été recueillie au neuvième recensement du Canada, effectué à compter du 1er juin 1951, paraît en deux volumes. Le Volume IV expose les caractéristiques fondamentales de l'ensemble de la main-d'oeuvre tandis que le Volume V traite principalement des particularités relatives au secteur des salariés de la main-d'oeuvre.

**Main-d'oeuvre.** — La main-d'oeuvre, telle qu'elle est définie pour les besoins du recensement de 1951, comprend toutes les personnes âgées de 14 ans et plus qui, durant la semaine terminée le 2 juin 1951:

a) travaillaient pour un salaire ou un profit, ou sans rémunération à l'exploitation d'une ferme ou d'une entreprise dirigée par un membre du ménage. (Déclarées "Au travail" à la question 20 ou "Oui" à la question 21.)*

b) avaient un emploi mais n'étaient pas au travail, pour cause de maladie, d'intempérie, de vacances, de différend industriel, ou de congédiement temporaire avec instructions expresses de retourner au travail dans les 30 jours qui suivent leur congédiement. (Déclarées "Employée mais non au travail" à la question 20 et "Non" à la question 21.)*

c) étaient sans emploi mais en quête de travail durant la semaine. Cette catégorie comprend les personnes qui auraient cherché du travail sans l'empêchement d'une maladie passagère, d'un congédiement indéterminé ou prolongé, ou parce qu'elles ont cru qu'il n'y avait aucun emploi disponible. (Déclarées "En quête de travail" à la question 20 et "Non" à la question 21.)*

**Personnes ne faisant pas partie de la main-d'oeuvre.** — La portion inactive de la population de 14 ans et plus se compose des personnes qui, durant la semaine terminée le 2 juin 1951, ne faisaient pas partie de la main-d'oeuvre, c'est-à-dire qu'elles ne travaillaient pas pour un salaire ou un profit ou sans rémunération au compte d'entreprises familiales telles que fermes ou commerces, qu'elles étaient sans emploi en même temps que sans travail et n'étaient pas activement en quête de travail. Font donc également partie de cette classe les personnes qui fréquentaient l'école, qui tenaient maison, les personnes incapables en permanence de travailler, retirées ou volontairement inactives, ainsi que les personnes qui n'entrent dans aucune des autres catégories.

a) **A tenu maison.** — Toute personne occupée à son propre travail ménager ou à l'entretien de sa propre maison ou de ses enfants, qui avait aidé, dans le même travail, d'autres membres du ménage ou qui l'aurait fait n'eût été d'une maladie passagère. (Déclarée "A tenu maison" à la question 20 et "Non" à la question 21.)*

b) **A l'école.** — Comprend toute personne fréquentant une maison d'enseignement où les élèves ne reçoivent aucune rétribution en espèces ou en nature. (Déclarée "A l'école" à la question 20 et "Non" à la question 21.)*

c) **Retirée ou volontairement inactive.** — Comprend: les personnes retirées qui bénéficiaient ou non d'une pension; les personnes aptes au travail mais qui ne travaillaient pas et n'étaient pas activement en quête de travail, ne tenaient pas maison ou ne fréquentaient pas l'école. (Déclarées "Retirée ou volontairement inactive" à la question 20 et "Non" à la question 21.)*

d) **Incapable en permanence de travailler.** — Comprend les personnes qui ne peuvent plus travailler à cause de leur âge avancé, d'invalidité physique ou mentale ou d'une maladie chronique. (Déclarées "Incapable en permanence de travailler" à la question 20.)*

e) **Autre.** — Comprend les personnes dont la principale activité ne semble pas figurer au classement de la main-d'oeuvre. (Déclarées "Autre" à la question 20 et "Non" à la question 21.)*

* Les questions 20 et 21 du Questionnaire de la population du recensement de 1951 ont été conçues de façon à classer les personnes de 14 ans et plus qui faisaient partie de la main-d'oeuvre, ou qui n'en faisaient pas partie, durant la semaine terminée le 2 juin 1951. Des instructions complètes sur la façon de répondre à ces deux questions, telle qu'elle est indiquée dans le "Manuel de dénombrement", sont reproduites à l'appendice A.

**Industry Inquiry.**— Persons in the labour force reported as "working" or "with a job and not at work" were asked to state the name of the firm or business where they worked as well as the nature or kind of business, industry, or service in which the firm or enterprise was primarily engaged. Those without jobs and seeking work but who had work experience reported the information for the firm or business where they last worked. New workers, that is, persons seeking their first job, were regarded as having no industrial attachment and are not included in the industry tables.

**Question sur l'industrie.**— Les personnes faisant partie de la main-d'oeuvre et déclarées "Au travail" ou "Employée mais non au travail" ont été priées de déclarer le nom de l'établissement ou de l'entreprise où elles étaient employées, de même que la nature ou le genre du commerce, de l'industrie ou du service représentant l'activité principale de cet établissement ou de cette entreprise. Les personnes sans emploi et en quête de travail mais qui avaient déjà travaillé donnaient des renseignements au sujet de l'établissement ou de l'entreprise où elles avaient tenu leur dernier emploi. Les nouveaux travailleurs, c'est-à-dire les personnes qui étaient en quête de leur premier emploi, n'étaient pas considérées comme faisant partie de la vie industrielle et ne sont pas comprises dans les tableaux de l'industrie.

**Occupation Inquiry.**— Persons in the labour force, except those seeking their first job, were asked to state the occupation at which they worked in the industry or service reported to the industry inquiry.

**Question sur l'occupation.**— Les personnes faisant partie de la main-d'oeuvre, sauf celles qui étaient en quête de leur premier emploi, ont été priées de déclarer l'occupation qu'elles exerçaient dans l'industrie ou les services déclarés à la question sur l'industrie.

**Occupational Versus Industrial Classification.**— Persons in the labour force were classified by occupation and industry in the tables of this volume. Although the group titles are, in general, the same in the two classifications, the composition of the groups is different. The industry group "Manufacturing", for example, includes all persons employed by manufacturing firms, whether engaged in the processes of production, the sale or transport of the product, or in clerical or other occupations associated with the industry. The occupation group "Manufacturing and Mechanical", on the other hand, includes only such persons as followed so-called "processing" occupations, that is, occupations in which they were directly engaged in the process of manufacture or repair, and all persons were so classified irrespective of whether they were employed by manufacturing firms or by mining, construction, transportation, etc., companies. Similarly the groups "Construction" and "Transportation", in the industry classification, include all persons employed in these industries regardless of the nature of their occupations while the corresponding groups in the occupation classification comprise only those persons who were following construction trades and transport occupations regardless of the industries in which they were employed.

**Classement selon l'occupation et l'industrie.**— Les personnes qui faisaient partie de la main-d'oeuvre ont été classées selon l'occupation et l'industrie dans les tableaux du présent volume. Bien que les titres des groupes soient les mêmes, en général, dans les deux classements, leur composition est différente. Le groupe d'industries "Fabrication", par exemple, comprend toutes les personnes employées dans les établissements de fabrication, qu'elles soient occupées à la production proprement dite, à la vente ou au transport des produits, ou dans les bureaux ou à d'autres fonctions relatives à l'industrie. Le groupe d'occupations "Fabrication et mécanique", par contre, ne comprend que les personnes employées au "conditionnement", c'est-à-dire les personnes qui sont engagées directement dans la fabrication ou dans les réparations; toutes ces personnes ont été ainsi classées, qu'elles aient été employées dans des manufactures ou des établissements miniers, ou par des compagnies de construction, de transports ou autres. De la même façon, les groupes de la "Construction" et des "Transports", de la classification des industries, comprennent toutes les personnes employées dans ces industries, quelle que soit la nature de leur travail, alors que les groupes correspondants dans la classification des occupations ne comprennent que les personnes qui s'adonnaient à des métiers de la construction ou à des occupations des transports, sans tenir compte des industries qui les employaient.

While labourers in primary industries were included with agricultural, fishing, logging, or mining occupations, as determined by the industry in which employed, those in non-primary industries were grouped together and appear in a residuary group in the occupation tables. This grouping of labourers in non-primary industries is necessary since the term "Labourer", so reported, gives no indication of the type of work performed by the individual. Even a knowledge of the industry in which the person is employed does not supply the necessary information as to the type of work performed, for a labourer in a steel mill might be working in a construction, transport, etc., type of occupation rather than in one directly concerned with the process of manufacture.

Bien que les manoeuvres des industries primaires aient été inclus dans les occupations de l'agriculture, de la pêche, de l'abatage ou des mines, dans les cadres de l'industrie qui les employait, ceux des industries non primaires ont été réunis en un groupe résiduaire dans les tableaux des occupations. Ce groupement des manoeuvres dans les industries non primaires est indispensable car le mot "Manoeuvre" ainsi employé n'indique pas la nature du travail exécuté par la personne employée. Le fait de connaître l'industrie qui emploie cette personne n'apporte pas les renseignements nécessaires au sujet de la nature du travail exécuté; le manoeuvre dans une aciérie peut travailler à la construction, aux transports, etc., plutôt qu'à telle occupation de fabrication proprement dite.

**Class of Worker.**— Persons in the labour force, except those looking for their first job, were classified as:

(a) **Employers.**— Persons who operated their own business, farm, or profession and employed any paid workers in connection with the business.

(b) **Own Account Workers.**— Persons who operated their own business, farm, or profession without the assistance of any paid workers.

(c) **Wage and Salary Earners.**— Persons who worked for wages, salary, piece rates, commissions, tips, or payment in kind or board and room.

(d) **Unpaid Family Workers (no pay workers).**— Persons who worked without pay on a farm or in a business owned and operated by a member of the household to whom they were related by blood or marriage. The work done must have contributed to the operation of the family enterprise.

**Classe de travailleur.**— Les personnes faisant partie de la main-d'oeuvre, sauf celles qui sont en quête de leur premier emploi, sont ainsi classées:

a) **Employeurs.**— Personnes qui exploitent leur propre entreprise, leur propre ferme ou exercent leur profession et qui emploient des travailleurs rémunérés pour les aider.

b) **Travailleurs à leur propre compte.**— Personnes qui exploitent leur propre entreprise, leur propre ferme ou exercent leur profession sans l'aide de travailleurs rémunérés.

c) **Salariés.**— Personnes qui travaillent pour un salaire, un traitement, à la pièce, moyennant commission, pourboires, ou rétribution en nature ou pension et chambre.

d) **Travailleurs familiaux non rémunérés (travailleurs sans paye).**— Personnes qui travaillent sans rémunération sur une ferme ou dans une entreprise possédée et exploitée par un membre du ménage parent par le sang ou par alliance. Le travail accompli doit avoir contribué à l'exploitation de l'entreprise familiale.

**Marital Status.** – In the marital status classification, the term "married" includes all married persons whether living together or not.

**Origin.** – For purpose of the census a person's origin or cultural group was traced through the father. For example, if a person's father was German and the mother Norwegian, the origin was reported as "German". Persons who were not able to state their origin were classified as "unknown".

Rules as to method of reporting origin for persons of mixed Indian and white parentage differed as between the 1941 and 1951 Censuses. While all persons of mixed Indian and white parentage were reported in 1941 as "Halfbreed", for the 1951 Census the rules were as follows:

(a) For those living on Indian reserves, the origin was reported as "Native Indian".

(b) For those not on reserves, the origin was determined through the line of the father, that is, by following the usual procedure.

**Years of Schooling.** – By years of schooling is meant the total number of school years the person attended any kind of educational institution beyond kindergarten, such as elementary school, secondary school, college or university. Private study and part-time attendance at classes counted for the equivalent number of years of formal schooling.

**Census Divisions.** – Since there are no county divisions in the Prairie Provinces, British Columbia, and Newfoundland corresponding to those in other provinces of Canada, permanent areas called census divisions were established for the publication of census statistics. Maps outlining the boundaries of census divisions are shown in Appendix B.

**Rural and Urban.** – Prior to the 1951 Census, the population residing within the boundaries of incorporated cities, towns and villages, regardless of size, was classified as urban and the remainder as rural. In the 1951 Census the aggregate size of the population rather than provincial legal status was the main criterion for the rural-urban definition. The urban population in 1951, therefore, includes all persons residing in cities, towns and villages of 1,000 and over whether incorporated or not, as well as the population of all parts of census metropolitan areas.

**Rural Farm and Rural Non-farm.** – The rural population was classified into rural farm and rural non-farm on the basis of place of residence. The rural farm population consists of all persons living on farms in rural areas, regardless of occupation. In the 1951 Census a farm was defined as a holding on which agricultural operations were carried out and which was:

(a) three acres or more in size; or

(b) from one to three acres in size with agricultural production in 1950 amounting to $250 or more.

**Census Metropolitan Areas.** – For census purposes, metropolitan areas have been established for groups of urban communities in Canada which are in close economic, geographic, and social relationship. Data for census metropolitan areas of cities with a population of 100,000 or over are given in this volume. Maps indicating the municipalities or subdivisions of the census metropolitan areas are shown in Appendix C.

**État matrimonial.** – Dans la classification selon l'état matrimonial, le terme "marié" comprend toutes les personnes mariées, qu'elles vivent ou non avec leur conjoint.

**Origine.** – Aux fins du recensement, l'origine d'une personne ou le groupe culturel dont elle fait partie a été retracée à celle ou celui du père. Par exemple, si le père d'une personne est allemand et la mère norvégienne, l'origine a été inscrite comme étant allemande. Les personnes qui ne purent déclarer leur origine furent inscrites sous "inconnue".

Les règles qui régissaient en 1951 la façon d'inscrire les personnes d'origine mixte (race blanche et race indienne) différaient de celles qui existaient au recensement de 1941. En 1941, toutes les personnes d'origine mixte (indienne et blanche) avaient été inscrites "métis". En 1951, cependant, les règles suivantes ont été appliquées:

a) Les personnes vivant dans les réserves indiennes étaient inscrites "indienne".

b) Pour les personnes ne vivant pas dans des réserves, l'origine a été déterminée d'après celle du père, c'est-à-dire d'après la méthode ordinaire.

**Années d'école.** – Le nombre d'années d'école signifie le nombre total d'années durant lesquelles la personne a fréquenté toute maison d'enseignement après le jardin d'enfance, soit: école primaire ou élémentaire, école secondaire ou supérieure, collège ou université. Les études privées et la fréquentation à temps discontinu comptent pour le nombre d'années d'études régulières auxquelles elles correspondent.

**Divisions de recensement.** – Étant donné qu'il n'existe pas dans les provinces des Prairies, en Colombie-Britannique et à Terre-Neuve des divisions de comté qui correspondent à celles des autres provinces du Canada, des régions permanentes, appelées divisions de recensement, ont été délimitées en vue de la publication de la statistique de recensement. Des cartes où se trouvent tracées les limites des divisions de recensement sont annexées à l'Appendice B.

**Population rurale et population urbaine.** – Avant le recensement de 1951, la population qui habitait dans les limites des cités, des villes et des villages constitués était classée, indépendamment de son importance numérique, comme population urbaine et le reste, comme population rurale. Au recensement de 1951, le principal critère qui a servi au classement de la population selon qu'elle était rurale ou urbaine a été l'importance numérique globale plutôt que le statut juridique provincial. La population urbaine comprenait par conséquent, en 1951, toutes les personnes qui demeuraient dans les cités, villes et villages de 1,000 habitants et plus, constitués ou non, de même que la population de toutes les parties des zones métropolitaines de recensement.

**Population rurale agricole et population rurale non agricole.** – La population rurale a été répartie entre population rurale agricole et population rurale non agricole selon le lieu de domicile. La population rurale agricole comprend toutes les personnes vivant sur les fermes dans les régions rurales, quelle que soit leur occupation. Au recensement de 1951, la ferme a été ainsi définie: une terre servant à l'exploitation agricole et ayant une superficie:

a) de trois acres ou plus ou

b) d'une à trois acres et une production agricole en 1950 de $250 ou plus.

**Zones métropolitaines de recensement.** – Pour les besoins du recensement, des zones métropolitaines ont été établies pour des groupes de collectivités urbaines au Canada qui sont en rapports économiques, géographiques et sociaux étroits. Les données relatives aux zones métropolitaines de recensement des cités de 100,000 habitants ou plus se trouvent dans le présent volume. Des cartes indiquant les municipalités ou les subdivisions des zones métropolitaines de recensement sont annexées à l'Appendice C.

**Armed Forces and Reserve Units.** – Members of Reserve Units at military camps during the week ending June 2, 1951, and all persons enlisted in the Active Armed Forces were classified as "Officers – armed forces" or "Other ranks – armed forces" in occupation tables and included in the class "Defence Services" in industry tables.

**Forces armées et unités de réserve.** – Les membres des unités de réserve qui se trouvaient dans les camps militaires durant la semaine terminée le 2 juin 1951 et toutes les personnes enrôlées dans les forces armées actives ont été classés comme "Officiers – forces armées" ou "Sous-officiers et soldats – forces armées" dans les tableaux d'occupations; ces personnes sont comprises dans la catégorie "Défense" des tableaux de l'industrie.

**Inmates of Institutions.** – Inmates in corrective and penal institutions; mental and tuberculosis hospitals; sanatoria; and homes for the aged, infirm, and needy were classed as "not in the labour force" at the 1951 Census. The number of such inmates is shown by age and sex in Table 3 of this volume. Regular workers on the staff of these institutions were included in the labour force.

**Pensionnaires des institutions.** – Les pensionnaires et détenus dans les maisons de correction et les établissements pénitentiaires, les personnes hospitalisées dans les hôpitaux pour maladies mentales, pour tuberculeux, dans les maisons de convalescence et les foyers pour les vieillards, les infirmes et les nécessiteux sont classés "en dehors de la main-d'oeuvre" au recensement de 1951. Le nombre de ces personnes est donné selon l'âge et le sexe au tableau 3 de ce volume. Les employés réguliers de ces institutions sont compris avec la main-d'oeuvre.

**Indians on Reserves.** – Due to their unique economic circumstances, Indians living on reserves at the time of the 1951 Census were classified as a separate group distinct from those "in the labour force" and those "not in the labour force". Due consideration should be given to this factor in any comparison with earlier censuses of the number engaged in fishing, hunting, and trapping. The number of Indians, 14 years of age and over, living on reserves at the time of the 1951 Census, is shown by age and sex in Table 3 of this volume.

**Indiens dans les réserves.** – A cause de leur situation économique toute particulière, les Indiens qui vivaient dans les réserves lors du recensement de 1951 ont été classés séparément, comme un groupe distinct des personnes de la "main-d'oeuvre" ou "hors de la main-d'oeuvre". Il faut tenir compte de l'importance de ce facteur dans toute comparaison, avec les chiffres des recensements antérieurs, du nombre de personnes employées dans "pêche" et dans "chasse et trappage". Le nombre d'Indiens de 14 ans et plus vivant dans les réserves lors du recensement de 1951 est indiqué selon l'âge et le sexe dans le tableau 3 de ce volume.

**Comparability with Earlier Censuses.** – Due to differences in definition and changes in occupational and industrial classification, figures published in this volume are not directly comparable with the data published in Volume VII of the 1941 Census or with the data of earlier censuses.

**Comparaisons avec les recensements antérieurs.** – A cause des différences de définition et des changements apportés au classement selon l'occupation et selon l'industrie, les statistiques publiées dans le présent volume ne sont pas rigoureusement comparables avec celles du Volume VII du recensement de 1941 ou avec les chiffres des recensements plus anciens.

**Comparability of Census Labour Force Data and Current Labour Force Survey Data.** – In addition to the labour force data obtained from the 1951 Census and published in this volume, the Dominion Bureau of Statistics has taken regular sample surveys of the labour force since November, 1945, to secure information at frequent intervals on employment characteristics of the Canadian people. One of these current sample surveys used the same reference week and general labour force definitions as the Census. There are, however, a number of differences between the labour force data published in the current labour force bulletin for the week ending June 2, 1951, and that obtained from the Census and published in this volume. Apart from sampling variability[1], results published from these two sources are different in three ways:

1. There is a difference in coverage. The current labour force surveys cover the population 14 years of age and over except for: inmates in institutions; Indians on Reserves; persons in the Armed Forces; and persons in relatively inaccessible areas. The Census shows at June 1, 1951, 117,084 inmates in institutions and 62,458 Indians on Reserves, 14 years of age and over, and 71,240 persons in the Armed Forces. It is estimated that 109,900 persons 14 years of age and over were living in the relatively inaccessible areas not covered by the current sample survey. This difference in coverage affects in some measure each of the labour force categories for which data are published.

**Comparaisons entre les données du recensement sur la main-d'oeuvre et celles du relevé courant de la main-d'oeuvre.** – En plus des données sur la main-d'oeuvre qu'il a obtenues du recensement de 1951 et qu'il publie dans le présent volume, le Bureau fédéral de la statistique a fait, depuis novembre 1945, des relevés-échantillon réguliers de la main-d'oeuvre, afin de recueillir des renseignements à de fréquents intervalles concernant les caractéristiques de l'emploi chez les Canadiens. Un de ces relevés-échantillon courants se réfère à la même semaine de base et aux mêmes définitions générales de la main-d'oeuvre que celles du recensement. Il existe cependant certaines différences entre les données de la main-d'oeuvre publiées dans le bulletin courant de la main-d'oeuvre pour la semaine terminée le 2 juin 1951 et celles du recensement, publiées dans le présent volume. En dehors de la différence de l'échantillon[1], les résultats publiés et provenant de ces deux sources diffèrent de trois façons:

1. Les cadres sont différents. Le relevé courant de la main-d'oeuvre englobe la population âgée de 14 ans et plus, sauf dans les cas suivants: pensionnaires dans les institutions; Indiens dans les réserves; membres des forces armées et personnes habitant des régions inaccessibles. Le recensement donne, au 1er juin 1951, 117,084 pensionnaires dans les institutions et 62,458 Indiens dans les réserves âgés de 14 ans et plus et 71,240 personnes dans les forces armées. On estime que 109,900 personnes de 14 ans et plus vivant dans des régions plus ou moins inaccessibles n'entrent pas dans le relevé-échantillon courant. Cette différence d'orbite influe jusqu'à un certain point sur chacune des catégories de la main-d'oeuvre dont les statistiques sont publiées.

1. See Introduction to Labour Force Reports prepared by the Special Surveys Division.

1. Voir l'Introduction des rapports sur la main-d'oeuvre préparés par la Division des enquêtes spéciales.

2. Enumeration of the whole population for census purposes presents problems which are not encountered in continuing sample surveys. The current labour force surveys ask relatively few questions, mainly on one topic, and, being taken frequently, often retain the same enumerator for several successive surveys. For these reasons the current survey can probe more deeply in order to bring out marginal elements in the labour force. Thus, the current survey reported more family members whose principal activity was going to school, keeping house, etc., as having done some unpaid family work on a farm or in a business during the week ending June 2, 1951, than were reported in the Census.

3. There are differences due to grouping of labour force data for publication purposes which are not inherent in the source data but must be taken into account when comparing current survey figures with those from the Census. The current labour force survey uses the category "persons with jobs" for further classification into class of worker, occupation, industry, hours worked, etc. The Census of 1951 uses for this same purpose the "experienced labour force" which includes not only persons "with jobs" but also persons "without jobs and seeking work" who had previous work experience. This latter group amounts to 78,057 persons.

2. Le dénombrement de la population entière aux fins du recensement suscite des problèmes inconnus dans les relevés réguliers. Ceux-ci ne comportent que relativement peu de questions, lesquelles portent sur une idée principale et, comme ils se répètent à de fréquents intervalles, souvent les agents recenseurs sont les mêmes pour plusieurs relevés successifs. Pour ces raisons, le relevé courant peut sonder plus profondément et faire ressortir les éléments marginaux de la main-d'oeuvre. Ainsi, le relevé courant a révélé un plus grand nombre de membres de familles, dont la principale activité consistait à fréquenter l'école, à entretenir la maison, etc., et qui avaient accompli une certaine somme de travail familial non rémunéré sur une ferme ou dans une entreprise, durant la semaine terminée le 2 juin 1951, que le recensement.

3. Il existe des différences attribuables au groupement des données de la main-d'oeuvre en vue de la publication et qui ne sont pas inhérentes aux données de source, mais dont il faut tenir compte en comparant les chiffres du relevé courant avec ceux du recensement. Le relevé courant de la main-d'oeuvre décompose la catégorie "personnes employées" en une classification plus détaillée par classe de travailleurs, occupation, industrie, heures de travail, etc. Le recensement de 1951 utilise à cette même fin la "main-d'oeuvre expérimentée", qui comprend non seulement les personnes "employées" mais également les personnes "sans emploi et en quête de travail" et qui avaient déjà travaillé. Ce dernier groupe compte 78,057 personnes.

1. The "Gainfully occupied" rather than the "Labour force" concept was used prior to 1951 for determining the labour force status.

2. Ten years of age and over in 1901 and 1911.
3. Not including Yukon and Northwest Territories.
4. It is not possible to exclude the Northwest Territories from the 1901 figures. Hence, figures for Saskatchewan in 1901 include what is now Saskatchewan, Alberta, and Northwest Territories.
5. The lower percentage of the population in the labour force for 1901 than for other census years is due in part to Indians being included in the population but not in the labour force.
6. Including persons on Active Service.
7. Not including persons on Active Service.
8. Including Newfoundland.
9. Not including Newfoundland.

1. Avant 1951, on employait le concept de "population active" plutôt que celui de "main-d'oeuvre" pour déterminer la situation dans la main-d'oeuvre.
2. Âgés de 10 ans et plus en 1901 et 1911.
3. Ne comprend pas le Yukon et les Territoires du Nord-Ouest.
4. Il n'est pas possible d'isoler les Territoires du Nord-Ouest des chiffres de 1901. Il s'ensuit que les chiffres de la Saskatchewan en 1901 comprennent ce qui constitue aujourd'hui la Saskatchewan, l'Alberta et les Territoires du Nord-Ouest.
5. Le pourcentage moins élevé de la population qui faisait partie de la main-d'oeuvre en 1901 que dans les autres années de recensement est dû en partie à l'inclusion des Indiens dans la population et non dans la main-d'oeuvre.
6. Comprend les personnes en service actif.
7. Ne comprend pas les personnes en service actif.
8. Comprend Terre-Neuve.
9. Ne comprend pas Terre-Neuve.

1. 10 years and over in 1901 and 1911.
2. Not including Newfoundland, Yukon, and Northwest Territories.
3. Does not include Indians.
4. Does not include Indians living on reserves.
5. Includes pulp mill employees.
6. Less than 0.005 per cent.
7. Includes almost all mine and smelter employees, except clerical workers.
8. Includes "Communication".
9. Includes proof readers, shippers, weighmen, and postmen classified elsewhere in other years. The addition of these persons to the 1931 figure would have added 18.0 p.c. to the number of males in this occupation group.
10. Labourers in all industries except agriculture, fishing, logging, and mining are included in this group.
11. Separate figures for "Manufacturing" and "Construction" not available for 1901.
12. Separate figures for "Transportation" and "Trade and finance" not available for 1901.
13. Separate figures for "Professional" not available for 1901.

Note. Occupations for 1901, 1911, 1921, 1941, and 1951 were rearranged on the basis of the 1931 classification, though some adjustment of the 1931 grouping was necessary. The principal changes made in the 1931 classification were the transfer of accountants from "Professional" to the "Clerical" group and of female labourers and packers and wrappers in manufacturing and trade from the groups "Labourers" and "Transportation", respectively, to "Manufacturing" and "Trade".

The 1941 figures in this table are exclusive of persons on Active Service on June 2, 1941.
